Hospet, 583201

Results-driven React.js Developer with a strong foundation in front-end development, Passionate about building dynamic, user-friendly web applications and improving operational efficiencies. Adept at problem-solving, technical support, and process optimization. Seeking a challenging role to contribute technical skills and innovation in a professional setting.

SKILLS & TECHNOLOGIES

- Front-End Development: React.js, JavaScript, HTML5, CSS3, Tailwind CSS
- Back-End Development: Node.js, Express.js
- Database Management: MongoDB
- Version Control: Git, GitHub
- UI/UX Design: Responsive Design, Mobile-First Development
- Other Skills: Problem-Solving, Debugging, Team Collaboration, Project Management

WORK EXPERIENCE

React Js Developer | WMD Services India Pvt Ltd

March 2024 – Present | Hospet

- Developed dynamic and responsive web applications using React.js, JavaScript, and Tailwind CSS.
- Implemented state management using Redux for efficient data flow across components.
- Integrated RESTful APIs using Node.js and MongoDB for backend data management.
- Designed and built interactive UI components following modern UI/UX principles.
- Worked with React Router for seamless client-side routing.
- Optimized application performance using React hooks (useState, useEffect, useContext, etc).

Service Engineer | VR Laptop Zone (Dell Exclusive Store)

Jan 2024 – March 2024 | Hospet

- Diagnosed and repaired 100+ laptops, desktops, and cabinets, achieving a first-time fix rate.
- Installed and configured software, drivers, and operating systems for 500+ devices, reducing setup time.
- Conducted maintenance and troubleshooting for 50+ printers and peripherals monthly, minimizing downtime.

PROJECTS

1. Portfolio Website

Technologies: React.js, Tailwind CSS

- Designed and developed a personal portfolio website showcasing skills, projects, and experience.
- Implemented a fully responsive layout for 100% mobile compatibility.
- Integrated GitHub repositories to highlight open-source contributions, increasing visibility.
- Implemented a customer feedback loop, analysing over 200 service reports quarterly to enhance troubleshooting procedures, resulting in a 20% improvement in customer satisfaction scores.

2. Restaurant Order-Taking Web App

Technologies: React.js, Tailwind CSS, Node.js, MongoDB

- Built a restaurant order management system, streamlining order-taking for waiters/staff and reducing manual errors.
- Designed an intuitive UI with React.js and Tailwind CSS, improving user experience ratings.
- Developed a backend using Node.js and MongoDB to store and manage orders efficiently, increasing order-processing speed.
- Implemented a table management feature, enhancing order organization and reducing wait times.
- Integrated real-time analytics to monitor order trends and staff performance, resulting in improvement in service efficiency and reduction in order processing time.
